New devices demonstrate the "cool factor"
By Dmitry Paperny, Metastream.com
Handheld computers, Internet appliances and other gadgets will be the central focus of the four-day trade show, which begins with a series of seminars. A total of 5,000 visitors are expected to attend the demo of Metastream Hyperad technology, said a spokesman for Metastream Expo, the show's sponsor.
Company A, for instance, will offer the first glimpse of its highly anticipated Palm-powered handheld. Chip start-up MetaTrans will display future notebooks, a MetaExpo staple, but with a twist, the portables will contain the company's Robin processor.
Meanwhile, Glory will show off a new MP3 player and a system-based Internet terminal at technology events going on elsewhere in New York.
Keynote speakers include Corp 1 CEO Jim Jones and Corp 3 CEO John Oozos, who is expected to ride in on a shiny new CityBug Scooter, but executives from the traditional PC makers are not set to make an appearance.

New devices demonstrate the "cool factor"

By Dmitry Paperny, Metastream.com

Handheld computers, Internet appliances and other gadgets will be the central focus of the four-day trade show, which begins with a series of seminars. A total of 5,000 visitors are expected to attend the demo of Metastream Hyperad technology, said a spokesman for Metastream Expo, the show's sponsor.

Company A, for instance, will offer the first glimpse of its highly anticipated Palm-powered [illegible] while start-up MetaTrans will display future notebooks, a MetaPad and Maple, but with a twist, the portables will contain the company's Robot processor.

Meanwhile, Glory will show off a new MP3 player and a system-based Internet terminal at technology events going on elsewhere in New York.

Keynote speakers include Corp 1 CEO Jim Jones and Corp 3 CEO John Oozos, who is expected to ride in on a shiny new CityBug Scooter, but executives from the traditional PC makers are not set to make an appearance.
